

Vette Net is the original wind deflector for the Corvette C5 and C6, everything else is just a bad copy. Our patient and simplicity is in the bracket lock down. A right and left bracket designed to sit in place under the hatch and is locked down for safety when closed. Put on the Net and away you go. Store it in our specially designed bag, place flat in the trunk and it goes with you wherever you go for ease and comfort in top down driving.

Vette Net - Patented Technology US Patent No. 6,352,300,B1

Vette Net has been in business for Ten (10) years, originally licensed by GM for the C5 Corvette. Now in solo production for the C5 and C6 model cars, we stand behind our good name, and will give proper service anytime you call. Although some have tried to copy our design, our patent protects the simplicity of the installation process, what every Corvette enthusiast appreciates: no car modifications.

#### OUR MISSION

Vette Net is not new technology, European cars have had auto wind deflectors for years; we simply put it on the Corvette for your enjoyment. For years Corvette enthusiasts have endured the beating of the wind, wind fatigue, hot and cold temperatures, road noise, wind buffeting, poor quality conversations, bad stereo sounds, dry skin, hats, and messed up hair, basic overall, uncomfortable top down driving. Vette Net is the answer for improved enjoyment in your convertible. Thirty day (30) unconditional guarantee against defects. Return our product, in new condition and original package, for any reason within 30 days. Take us for a spin and find out why so many choose us over the others. See you at the shows.

save the wave!

Sincerely,  
Rebecca Beal, CEO

## Wind Deflector

NO MODIFICATION TO YOUR CAR!

Easy on.... Easy off

No nuts, no bolts, no cuts, no nonsense

Simplicity in motion

On and off in seconds

# Take Your TOP OFF

- Anytime anywhere you can enjoy top down driving with the Vette Net
  - Installs with 3 easy pieces in seconds
  - No bolts, no screws, no cutting, no modification of your car
  - Stops wind buffeting
  - Greatly reduces road noise
  - Hear your stereo better
  - Have conversations with your guests
  - Stops wind fatigue
  - Air conditioner and heater work more efficiently
  - Increases top down driving season
  - May be adjusted in height for custom fit
  - Takes up no room in the trunk
  - The patent is in the simplicity of the installation process
  - Works with automatic tops too, just stop the process half way up to install the brackets.
- **Installs in seconds:**
    1. ***Pop the Hatch***
    2. ***Set the right and left brackets in place***
    3. ***Close the hatch, lock in place***
    4. ***Insert the Vette Net in the brackets***
    5. ***Tap gently to set Net in place***

That's it, **bye bye!**

Simply reverse the process to uninstall the Net.

Place your Net in the specially designed Vette Net bag flat in the trunk for safekeeping.

REMINDER:

- \* Remove brackets before raising top.
- \* Remove Net before raising the hatch.
- \* Vette Net is not responsible for damage caused from improper use
